Who we are?

EDIFICA, the most important International Construction Fair in Latin America, will be held from 15 to 17 October 2024, in Espacio Riesco, Santiago de Chile.

EDIFICA is organised by the Chilean Chamber of Construction, CChC, a trade association whose objective is to promote the development and promotion of construction activity as a fundamental lever for the development of the country, in the context of a social market economy based on private initiative.

The CChC is part of the Confederation of Production and Commerce, CPC, an entity that brings together the trade associations of the main productive and service sectors in Chile, as well as the Ibero-American Federation of the Construction Industry, FIIC, and the Confederation of International Contractors' Associations, CICA.

Produced and marketed by Espacio Riesco, the 2024 event will have more than 40,000 square metres of exhibition space in the country's most important exhibition centre, which has 160,000 m² of space and varied facilities, suitable for the professional development of this international activity, in which around 400 exhibiting companies will take part.

Why Edifica?

For 33 years, EDIFICA has been bringing together in one place all the players in the sector to showcase the latest trends, advances in building solutions and technologies. The fair provides more than 2,000 direct jobs and generates around US\$10.5 million in revenue for the city of Santiago, the capital of Chile.

The next edition inspires us to strengthen the reactivation and commercial opportunities, providing the necessary knowledge to advance and recover our economy. EDIFICA will generate more than 1,000 business meetings.

Programme of activities

EDIFICA will complement its exhibition offer with a full programme of activities for professionals in the sector and in which more than 60 sessions and technical talks will present real projects that will highlight materials, construction systems and technologies for responsible construction; meetings between companies and professionals, as well as different content sessions that highlight the incorporation of women throughout the construction value chain.

Highlights:

- Business meetings and forums
- Business round table
- Conferences, technical talks and training sessions
- Practical and interactive workshops
- Full-scale construction demonstrations
- Startup showcase
- Workshop area
- Thematic exhibitions
- Other

The central themes are

- Industry innovation
- Construction solutions
- Industrialisation of housing
- Energy and water efficiency
- Circular economy
- Sustainability
- Digital Transformation
